

Martin Co., Line to Lake Worth Inlet and from South Lake Worth Inlet to Broward, General Design Plan, Implementation, Martin and Broward Counties, FL.

Summary: EPA expressed environmental concerns regarding the long-term consequences of how this action meshes with other, similar beach nourishment projects planned for the county's shoreline. EPA was particularly concerned over impacts to nearshore hardbottom habitat.

Dated: April 11, 1995.

B. Katherine Biggs,

Associate Director, NEPA Compliance Division, Office of Federal Activities.

Science Advisory Board; Clean Air Act Scientific Advisory Committee; Notification of Public Advisory Committee Meeting(s); Open Meeting

Pursuant to the Federal Advisory Committee Act, Public Law 92-463, notice is hereby given that the Clean Air Scientific Advisory Committee (CASAC) of the Science Advisory Board (SAB) will meet on May 4-5, 1995 at the Courtyard Marriott, 2700 Eisenhower Avenue, Alexandria, Virginia 22314; telephone (703) 329-2323. The meeting will begin at 9 a.m. and end no later than 5 p.m. on both days. This meeting is open to the public. Due to limited space, seating will be on a first-come basis. For further information, please contact the individuals listed below. Documents that are the subject of SAB reviews are normally available from the originating EPA office and are not available from the SAB Office.

This meeting of the Clean Air Scientific Advisory Committee (CASAC) will focus on reviewing the scientific and technical adequacy of the agency's "Health Assessment Document for Diesel Emissions" (a document from the Office of Research and Development, Office of Health and Environmental Assessment (OHEA), Environmental Criteria and Assessment Office in Research, Triangle Park, NC—ECAO). The specific issues to be addressed during the CASAC review are as follows:

1. Does the document accurately represent the key literature on diesel emissions?

2. Are the cancer and noncancer hazard identification and dose-response assessments scientifically appropriate? In particular:

(a) Is the application of dosimetry modeling scientifically sound?

(b) Are the modes of action appropriately identified and applied to the health assessment?

(c) Are the qualitative and quantitative cancer risk estimates scientifically appropriate?

(d) Is the diesel inhalation reference concentration (RfC) scientifically appropriate?
